## PROFILE

---

Dedicated full-stack developer specialising in frontend and backend architecture, with over five years of experience building robust web applications. Proficient in a modern tech stack including React, TypeScript, Node.js, and advanced headless Content Management Systems, alongside AI-assisted tools and agentic coding for enhanced efficiency. Passionate about applying modern web performance techniques, seamless integrations, and optimised server-side rendering to deliver high-performance, pixel-perfect digital experiences.

## WORK EXPERIENCE

---

### Senior Developer

Apr 2026 – Present

Prev: Developer

Jul 2025 – Apr 2026

#### *Plato Global*

- Delivering full-stack work across 35+ client websites in the ANZ region, spanning new builds, feature and design enhancements, third-party integrations, and ongoing maintenance within a fast-paced marketing agency environment.
- Implementing seamless integrations and pixel-perfect frontends where required, ensuring reliability and optimised page speed across platforms to support client growth.
- Scoping technical requirements, estimating effort, and triaging production issues to keep client projects on track and minimise downtime.
- Leveraging AI-assisted tools and agentic coding workflows to accelerate delivery, automate repetitive tasks, and maintain high code quality across projects.
- Onboarding and mentoring new developers, providing technical guidance to accelerate their adoption of team workflows and Plato's dev best practices.

### Senior Software Engineer

Sep 2023 – Jul 2025

Prev: Software Engineer

May 2022 – Sep 2023

#### *Accenture Inc.*

- Developed and maintained micro-frontends using React, TypeScript, Redux, and Node.js.
- Scaffolded the micro-frontend shell and designed a shared error handling framework, distributed as an internal npm package consumed by all micro-frontends.
- Built and maintained a reusable React component library with Storybook to standardise user interfaces across the micro-frontend shell and 5+ micro-frontends.
- Applied test-driven development practices to maintain 90% test coverage across the micro-frontend codebase, ensuring high-quality and reliable code.

### Frontend Developer (Part-time)

Mar 2022 – May 2022

#### *Cradletech Solutions*

- Collaborated with the Head Developer to enhance and extend features of an existing web application.
- Designed and implemented an in-app chat module using React and Firebase to enable real-time user communication.

## Software Engineer

Jul 2021 – Apr 2022

*Enrise Global Inc.*

- Translated UX designs into fully functional web applications using React and TypeScript.
- Developed RESTful APIs with Laravel and MySQL to support efficient data management and retrieval.

## IT Intern

Dec 2019 – Nov 2020

*Kredo IT Abroad Inc.*

- Collaborated with senior developers on bug fixes, feature enhancements, and code reviews.
- Provided technical support and troubleshooting for internal systems and end users.

## SEO Assistant

Aug 2019 – Nov 2019

*UniversalTech Inc.*

- Collaborated with content and development teams to implement technical SEO improvements, including adjusting HTML markup on WordPress pages to support on-page optimisation.

## EDUCATION

---

### BS Information and Communications Technology

Jun 2015 – May 2021

*University of San Carlos*
